

## If You Require Surgery

Surgeries are performed at Colorado Plains Medical Center, East Morgan Community Hospital and Sterling Regional Medical Center. Some minor surgeries, including some vasectomies, are performed in our office. After you have discussed and decided on surgery that surgery is the best treatment for you, you will meet with the nurse to discuss your surgery and the care you will need before and after surgery.

The receptionist or nurse will schedule your surgery and any tests that need to be done before surgery. We will contact your insurance company for any required preauthorization information. The business office staff will make payment arrangements with you for any balance that remains after insurance payment. If you do not have insurance you will be required to make complete payment prior to your surgery.

You will receive charges for surgery that include the surgery, laboratory and x-ray services, operating room services, hospital care as needed, and routine postoperative care in our office. If you require care beyond routine postoperative follow-up, you may have additional charges.
