

Lab Services and Results

We do not provide in-house lab services. Most patients are sent to labs outside our office mostly in the patient's local hospital, we will give you instructions to go to the lab that is the most appropriate for the test ordered.

Any labs we refer you to will have their own policies regarding payment. Please speak to that particular lab regarding any questions you may have.

Most lab results are available in our office within 24-48 hours. The results of a PSA or a biopsy are usually available to us in 7 working days. Most of the time and appointment is scheduled for you to come back and discuss your results with Dr. Fauconier. This will allow you time to discuss the results and plan treatment options with Dr. Fauconier.
